Ellipse Practice

For each question:

- a. put the equation in standard form (Show work)
- b. state the center point
- c. find and state the vertices and covertices (Show work)
- d. graph the ellipse
- e. find and state the foci (Show work)
- f. state the length of the major axis
- g. state the length of the minor axis

1.  $9x^2 + 25y^2 - 36x - 50y - 164 = 0$

2.  $x^2 + 4y^2 + 6x - 8y + 9 = 0$

3.  $9x^2 + 4y^2 - 36x + 8y + 4 = 0$

4.  $4x^2 + y^2 + 4y - 8x - 8 = 0$

5.  $9x^2 + 4y^2 + 36x - 24y + 36 = 0$

6.  $16x^2 + 25y^2 - 32x + 50y - 359 = 0$
